

OA Football BLACK UNIFORMS

Garb Athletics Uniform Cleaning and Drying Instructions

Uniforms should be washed immediately after each use if at all possible, in cold water.

The rinse cycle should likewise be set for cold water

We recommend a detergent similar to Tide® for Coldwater.

Prior to washing, turning the garments inside out will help preserve the twill and screen print lettering.

Do not wash uniforms with other items, such as towels.

DO NOT USE CHLORINE BLEACH!

DO NOT DRY UNIFORMS ON HIGH HEAT – recommended to HANG DRY or if using dry us only low heat.

If you must use a dryer, use a damp dry or air dry setting. High heat can cause shrinkage, screen print ink to crack, twill to wrinkle, etc.

DO NOT OVERLOAD THE DRYER.

The uniforms will stick together, especially those with screen print ink. Remove the garments immediately after the dryer has finished.

DO NOT DRY CLEAN OR IRON.

To avoid static and lint build-up, use an anti-static agent such as Bounce® Dryer Sheets.

Store in a cool, dry area, protected from sunlight and fluorescent lighting.

*If tackle twill arrives with an adhesive spot, simply wash uniform and the spot will be removed. All adhesive used is water soluable and will be removed in the wash.

Heavily soiled garments (grass, dirt, clay, mud), pre-treatment we recommended Garb Athletics' specialized uniform cleaner (SPORTS CLEANER) available at www.store.garbathletics.com

Spray liberally onto the stained area and rub in with a soft brush or cloth. Let sit for 3-5 minutes before putting in your washing machine, using the detergent you normally use. Some customers like to add a small amount of Sports Cleaner in with the detergent. For old, set-in stains, spray liberally and let sit for 24 hours. Then, spray again and let sit for 3-5 minutes before washing.**DO NOT OVERLOAD WASHER.** Remove uniforms immediately after washing and hang dry all garments if at all possible. See more details on the following page.
